

Global Protected Crypto Copyright

Service for protection intellectual property

Who we are?

We are from www.parazitakusok.ru, a books-with-stickers manufacturer since 2011 and the largest online designers stickers shop in Russia (www.gagabuzz.com – International marketplace). We are developing the GPCC platform for creative people. With the GPCC platform, we want to offer a decentralized platform for worldwide protection of intellectual property, thus disrupting international copyright.

Our vision.

Our mission is to protect intellectual property and to popularize creative people. With our platform, authors and creators of any digital content are given an opportunity to self-actualize by earning money for the results of their work and by giving crowdfunding opportunities. With our copyright protection system, people can focus more on their creative work and feel protected. Using modern technologies, we are making our work more open, safe and profitable for everyone.

How do we do this?

We provide a service with which authors and other creative people can upload original work through a peer-to-peer content storage system (CASPER API). The authorship specification and upload time will be saved in the blockchain, providing the author with a copyright certificate. Through smart contracts, other users will be able to obtain a copy of the authors' work in exchange for GPCC tokens. On top of this, our own, to be developed, neural network will scan the internet for copies. Lastly, authors will be able to conduct crowdfunding campaigns in order to raise funds for the creation of new original work.

Current progress

A business plan for the platform creation developed.

A strong team with extensive business experience gathered

Legal bearings of the case studied

The www.gagabuzz.com marketplace exists. Beta.

Experience in implementing international projects acquired

Road-map

- 15 June 2018
Release of the alpha version of the GPCC.IO platform
alpha.gpcc.io
- 1 July 2018
Release of the beta version of the GPCC.IO platform
<https://beta.gpcc.io>
- 1 September 2018
Official launch of the GPCC.IO platform

Token GPCCT

UTILITY TOKEN

GPCCT token works as the sharing instrument and it means utility token.

REWARD

Reward amount (50% of total price) can be shared between User and Tokenholder.

SHARING PROCESS

Reward sharing process is managed by Tokenholder only.

Token price

Token GPCCT

Price 1 GPCCT = 0.15 USD

Bonus Available

Platform Ethereum

Hard cap 14 000 000 USD
